PROFESSIONAL EXPERIENCE

PlugPV, LLC — IT Intern (Data & Analytics) | Troy, NY | Jan 2026 – Present

- Developed SQL-driven dashboards in Zoho Analytics to analyze permit processing, project status, and business operations.
- Built financial forecasting models and cash flow projections using historical business data to support strategic planning and decision-making.
- Designed and optimized internal business applications and CRM workflows to improve reporting efficiency and business operations.
- Engineered a data integration solution using REST APIs to overcome platform limitations, enabling automated synchronization between analytics and CRM systems.

Siena College Research Institute — Research Analyst Intern | Loudonville, NY | Jul 2025 – Jan 2026

- Prepared and validated large-scale national survey datasets using SQL, Python, and R to support accurate statistical analysis.
- Analyzed national political and economic survey data to identify trends and support research-driven decision making.
- Developed interactive Tableau and Power BI dashboards to communicate survey findings and key performance metrics.
- Applied statistical weighting techniques to improve survey representativeness and reduce sampling bias.

Prime Commercial Bank Ltd. — Assistant | Birgunj, Nepal | Jan 2021 – Apr 2023

- Supported credit evaluations by analyzing financial documents and verifying regulatory compliance.
- Reconciled and validated high-volume banking transactions to maintain reporting accuracy and data integrity.

PROJECTS

Portfolio Optimization & Uncertainty Modeling (GitHub) — Developed a quantitative model to optimize investment portfolios under uncertain market conditions.

Portfolio Stress Testing (GitHub) — Evaluated portfolio resilience using historical financial crises to support risk analysis.

3-Statement Financial Modeling (GitHub) — Built an integrated financial model to assess company performance and support investment decisions.

RAG Research for Financial Document Analysis (GitHub) — Presented research on AI-powered analysis of SEC financial filings at the NY UPSTAT Conference.

Financial Forecasting Research (GitHub) — Developed predictive models to analyze stock price trends and support financial forecasting.
